

## Mincom Output Designer Administration

---

**Course ID:** TE-05

**Course Length:** 2 Day(s)

**Modules Included:** HTML Reporting, MS Word Reporting, XML Report Generation

**Prerequisites:** Mincom Ellipse Functional System Administration

**Intended Audience:** Those individuals responsible for installing and administering Mincom Ellipse devices and/or installing and administering Windows and Application servers

**Course Description:** Mincom Output Designer provides flexible, fast, and cost effective ways to create and maintain sophisticated document output. The Output Designer module produces Mincom Ellipse reports via MS Word or creates formatted HTML documents. The Mincom Ellipse report output is tagged using Extensible Markup Language (XML) and then merged with an MS Word template via a dedicated Windows server. This enables the development of reports and MS Word templates to produce a suitable format for business processes, allowing for the inclusion of custom content (e.g. company logos).

**Format:** The course is a combination of instructor-led and hands-on exercises to maximize the learning outcomes.

---

### At the end of this course, the participant will be able to:

Install and configure the Output Designer server

Configure a print queue appropriate to the Mincom Ellipse application server environment

Configure Mincom Ellipse devices for use by the Output Designer server

Configure the Output Designer controls for new and existing reports

Identify tips on troubleshooting an Output Designer installation
