

## Mincom Output Designer Programming

---

**Course ID:** TE-06

**Course Length:** 3 Day(s)

**Modules Included:**

**Prerequisites:** ReportLink, MS Word, Mincom Output Designer Administration

**Intended Audience:** Those individuals responsible for designing, creating and modifying Output Designer reports

**Course Description:** Mincom Output Designer produces Mincom Ellipse reports via MS Word or formatted HTML documents. The Mincom Ellipse report output is tagged using Extensible Markup Language (XML) and then merged with an MS Word template via a dedicated Windows server. This enables the development of reports and MS Word templates to produce a suitable format for business processes, allowing for the inclusion of custom content (e.g. company logos). Mincom Output Designer consists of three components: HTML reporting, MS Word reporting and XML report generation.

**Format:** The course is a combination of instructor-led and hands-on exercises to maximize the learning outcomes.

---

**At the end of this course, the participant will be able to:**

Install the Output Designer MS Word helper tool

Create and maintain XML-generated ReportLink reports

Create and maintain the appropriate mark-up of MS Word templates to be Output Designer-ready

Understand how to support a fax server for faxing generated reports
